ABOUT

History of UCAS

Located in Beijing, University of Chinese Academy of Sciences was established with the approval of Ministry of Education of the People's Republic of China (PRC). Its predecessor, Graduate University of Chinese Academy of Sciences (GUCAS), was the first graduate school in China. UCAS granted China's first PhD degree in science, first PhD degree in engineering, first PhD degree to a female student, and first double PhD degrees. In June 2012, GUCAS was renamed UCAS.

UCAS and CAS

UCAS is administered and managed by Chinese Academy of Sciences (CAS), which was established in 1949. Comprising more than 100 institutes, CAS is China's highest academic institution in natural sciences, highest-ranking consulting institution in science and technology, most preeminent research and development center for natural sciences and high technology, and most important base in the training of advanced scientific talents.

UCAS Education: "The Fusion of Research and Teaching"

Most of our faculty is selected from different institutes of Chinese Academy of Sciences(CAS Institutes) where its education and research centers and scientific platforms are distributed. Most of our colleges are jointly run by CAS Institutes, therefore, UCAS is believed to be a university that integrates scientific research and teaching.

As of Dec, 2021, UCAS had 72 teaching and research institutes, 16 affiliated hospitals, 73 national key labs, 191 CAS key labs, 39 national engineering research centers (labs) and various national frontier scientific research projects. It also boasts a huge talent pool where there is 3,155 professors, 12880 supervisors, including 191 CAS members and 7537 PhD supervisors from two national research centers (or labs).

Taking advantages of the top research and human resources of CAS, UCAS is committed to building itself into a world-class university. According to the Essential Science Indicators (ESI) report released in March 2022, UCAS ranked 42th worldwide, and 1st among all the universities in Chinese mainland. In terms of ranking lists by research fields, UCAS found itself in the top 1 ‰ in the fields of materials science, chemistry and environment/ecology, the top 1 ‰ in 9 fields, including materials sciences, chemistry, environment/ecology, plant & animal sciences, geosciences, biology & biochemistry, physics, agricultural sciences and engineering, and the top 1% in 19 fields.

International Cooperation

Based on CAS and its extensive international network of scientific cooperation, UCAS has established close partnerships with esteemed overseas institutions of higher learning such as Harvard University, Massachusetts Institute of Technology, Columbia University, Stanford University and Cambridge University, and research institutes including British Royal Academy of Sciences, French National Research Center, German Academic Exchange Center, American Academy of Sciences.

UCAS is a member of the Association of Pacific Rim Universities (APRU), and has co-founded the Sino-Danish College in China with the Danish Ministry of Science and Education and eight Danish public universities, and has established the ICTP-AP with UNESCO. Supported by the Kavli Foundation of the United States, UCAS has also founded a Kavli Institute for Theoretical Sciences, one of the 20 Kavli institutes across the world.

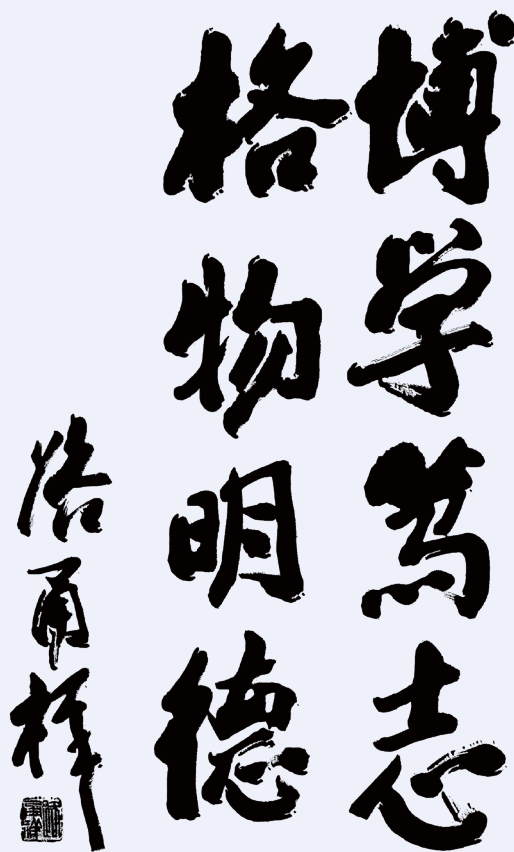

To help promote education in Belt and Road countries, UCAS has been involved in international projects, including UCAS Overseas Joint-Science and Educational Centre, ANSO fellowship and the CAS “Belt and Road” Master fellowship program.

For Better Students For Better Future

Embracing its motto “Knowledge, Devotion, Wisdom, Virtue”, carrying the CAS tradition of “Science, Democracy, Patriotism and Dedication”, and promoting the CAS ethos of “Practicality, Truth, Cooperation, and Innovation”, UCAS is committed to laying a solid foundation for the students for future scientific research through strengthening their innovation capabilities, cultivating their down-to-earth characters, and developing their social responsibility. In its development path towards a comprehensive national science center, UCAS is reaching further to explore its potential in the fusion of research and teaching, in order to build itself into a top world-class university by 2035.

MOTTO AND

The motto of the University is “博学笃志，格物明德”

(bo xue du zhi, ge wu ming de).

The motto in English is “**Knowledge, Devotion, Wisdom, Virtue**”.

CAMPUSES

There were 117 institutions directly under the CAS, with 97 research institutes (including three botanical gardens); five universities & supporting organizations (including two universities, one supporting organization, one documentation and information unit, and one publication unit); 12 management organizations that consist of the headquarters and branches; and three other units. There were 26 legal entities affiliated. Moreover, there were 22 CAS invested holding enterprises.

The University of Chinese Academy of Sciences(UCAS) has no boundaries, because it integrates with over a hundred CAS-affiliated research institutes across the nation.

Based on the operating mechanism of “co-ownership, co-governance, sharing and mutual development” between UCAS and CAS institutes, UCAS has become a “large campus”, which includes four campuses in Beijing, (Yuquanlu, Zhongguancun, the Olympic Village and Yanqi Lake), five education bases (Shanghai, Guangzhou, Wuhan, Chengdu and Lanzhou) and 114 research institutes across the country.

The campus on Yuquan Road, the registration location, is small yet quaint. Against the lush lawn, the auditorium facing the school gate is full of the atmosphere of history. The Yuquanlu Campus is also the only campus along Chang'an Avenue inside the fifth Ring Road. It adjoins the Institute of High Energy Physics and the National Laboratory of Beijing Electron--Positron Collider (BEPC).

The Zhongguancun Campus is located in the China's Silicon Valley and the Olympic Village Campus is adjacent to the Beijing National Stadium(The Bird's Nest), which is one of the main venues of the 2008 Summer Olympic Games. Both of these two campuses are featured by the stimulating environment for technological innovation and entrepreneurship.

Located at the foot of the Luotuo Mountain in Huairou District, the Yanqi Lake Campus adjoins Yanqi Lake in the south and the Ming Great Wall in the north, covering an area of 3.12 million square meters and a building area of 360,000 square meters. The campus came into use in September 2015. As a poem goes “the needles of pine trees remain lush despite of the bitter weather, the lake is large and clear”, this is an ideal place where future scientists could follow their heart and commit themselves into learning. The place used to be the major base for the development of “two bombs and one satellite” in the 1960s. The Memorial Museum of the Chinese Academy of Sciences and “Two Bombs and One Satellite” rebuilt from the Huairou Rocket Test Base is situated among the evergreen pines and cypress trees on the campus.

Office Location

Zhongguancun Campus

Address | No.80 Zhongguancun East Road, Haidian District, Beijing, China

Institute of Theoretical Physics

Address | No.55 Zhongguancun East Road, Haidian District, Beijing, China

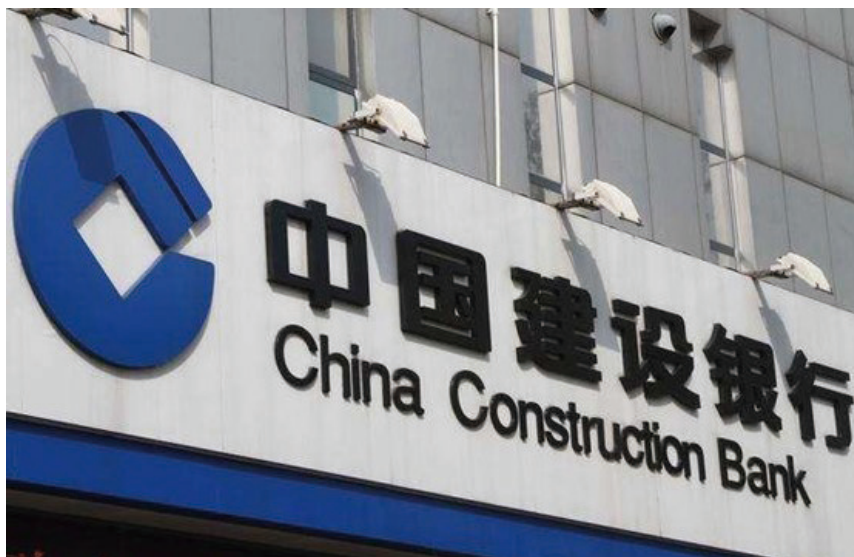

Banks

China Construction Bank (Beijing Baofusi Branch)

Address | No.18, Zhongguancun East Road Choi Chi Building
Floor 1, Haidian District, Beijing China

Tele | +86(10) 8262 1081

Route | The bank is 700 meters away from the Basic Sciences Park of CAS and you can walk there within 10 minutes.

HSBC Bank (Tus Park Branch)

Tele | +86(10)5999 6566

Address | No.1 Courtyard, Zhongguancun East Road Building
9 Sohu.com Internet Plaza Floor 1 Unit 07A, Haidian District,
Beijing China

Route | The nearest HSBC Bank is 1.3 kilometers away from the Basic Sciences Park of CAS and it takes you about 20 minutes to walk there or 11 minutes by bike.

Standard Chartered Bank (Zhongguancun Branch)

Tele | +86(10) 5918 5300

Address | Haidian Middle Street 6 New Oriental North Building Floor 1, Haidian District, Beijing China

Route | The nearest Standard Chartered Bank is about 2.3 kilometers away from the Basic Sciences Park of CAS and it takes you about 13 minutes to there by bike.

TRANSPORTATION

Flying To Beijing

Both Beijing Capital and Beijing Daxing International Airports serve the City of Beijing.

Beijing Capital International Airport is about 40 minutes by car/taxi and 90 minutes by public transportation to our Zhongguancun Campus.

Beijing Daxing International airport is farther and it takes about 70 minutes by car/ taxi and 120 minutes by public transportation to our Zhongguancun Campus.

Public Transportation

Beijing has an extensive public transport system, largely based on buses, taxis, and a rapidly expanding metro system. All of these public transport tools can be accessed using the Beijing Public Transportation Card or the digital card on your smartphone.

Metro Train

Beijing Metro Line 13

can be boarded downtown at Wudaokou or ZHICHUNLU stations to ride down to our Zhongguancun Campus.

Beijing Metro Line 10

can be boarded at ZHICHUNLU or ZHICHUNLI Stations to ride down to our Zhongguancun Campus.

■ Sharing Bike

There are three major types of deposit-free sharing bike serving the capital city of Beijing, and you can ride them by scanning the QR-code on the bike with WeChat or the apps linked to them.

Type I. Hellobike: blue-colored, App: Ali-Pay or Hellobike

Type II. Meituan Bike: Yellow-colored, App: Meituan(a food delivery app) or scan it with WeChat(Chinses WhatsApp)

Type III. DiDi Bike: Green-colored, App: Didi Chuxing (ride-hailing app) or scan it with WeChat

ACCOMMODATION

You can apply for an apartment in Zhongguancun Talent Apartment of UCAS and you may also choose to book a hotel by yourself before arrival.

Zhongguancun Talent Apartment

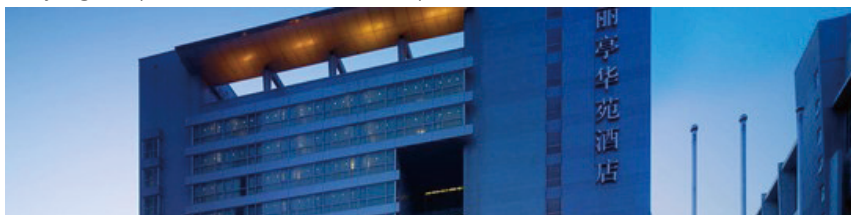

Address | Side Road of N. 4th Ring Road West, Haidian District

Park Plaza Beijing Science Park

Address | 25 Zhi Chun Road, Haidian District, Beijing 100191, China

Contact | +86 10 82356699

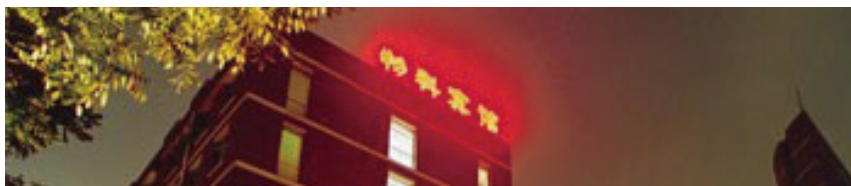

Route | You can reach the hotel by car within 35 minutes from Beijing Capital International Airport.

Wuke Hotel

Address | No.8, Zhongguancun South 3rd Street, Haidian District

Contact | 010-8264 9482

MEDICAL SERVICE

How to see a doctor

1) Make an appointment.

You are recommended to make an appointment in advance. You can make an appointment via WeChat Official Account, telephone, website, or onsite self-service machines.

2) Register.

Bring your passport to register at the check-in counter and get a medical card for the first time. You can charge your medical card to pay for visits to doctors.

3) See a doctor.

After registration, go to the waiting room and wait for your name to be called along with your doctor's room number.

4) Pick up your prescriptions.

If your doctor prescribes medications, please return to the lobby and use the medical card to pay for the pharmacy items on the automated machine. Next wait for your name to be called before going to the pharmacy window to pick up your prescriptions. room number.

Tips:

If you don't speak Chinese, it would be helpful to have a Chinese-speaking colleague or friend to go with you to help you through these steps.

Here are some hospitals for your reference and you may want to keep all receipts of any treatment and service received for insurance reimbursement.

Nearby hospitals for your reference:

■ Bejing Zhongguancun Hospital 北京市中关村医院

Address | 12 Zhongguancun South Rd, Haidian (海淀区中关村南路 12 号)

(Zhongguancun Subway Station C3 Southeast Entrance & Exit Pedestrian 490 Meters)

Peking University Third Hospital

北京大学第三医院

Address | 49 Huayuan North Rd., Haidian District(海淀区花园北路 49 号)
